I'M THINKING OF A NUMBER-PLACE VALUE Set 1

Directions:

- Copy the cards onto cardstock. There is a master for the back of the cards at the end of the document.
- Laminate the cards if you want them to last longer or if you are going to use the cards in a center.
- I use the cards in a small group at first and have them build the number on a place value mat. We discuss how they determined the number from the clues.
- When the activity is moved to a center, students shuffle the cards, draw one card, build the number and record it on their response sheet.
